FROM THE MUSTY PAST.

MANY SUPERSTITIONS ROOTED IN OLD PAGAN BELIEFS.

Clinging to the Ignorance of the Past as Well as to Its Wisdom-The Unlucky Day-The Barking Dog-Cutting Nails and Hair by the Moon.

I want now to lock with a little more particularity into the origin of some of ur superstitions. I have already told you, in a general way, what I now wish to emphasize, that the largest part of them are modern survivals of old nature myths and pagan religions. That the old world is still vital in us we are giving evidence every day of our lives. Our common speech is full of traces of old beliefs, just as the rocks under our feet are full of fossils and tracks of creatures long since extinct. Our carnivals, Mardi Gras and Lents; our Christmas trees, yule logs, gift making, mistletoe boughs

and evergreens; our New Year and May-day festivals; our Easter rejoicings,

Easter eggs and carols; all of there are

thousands of years old and have their sources in all nations and all religions. The peasants of England still kindle their Bel fires which across the darkness of the centuries flame out an answering signal to the old Phœnicians; and they were kindled at the still more antique fires of the older Persians; and even these last are only modern representatives of the old first fires of the first wor-shipers, who, in far off dimness of the years, first made on earth a fire in honor of their heavenly god, the sun. The past, then, where is it? It is all about us and in us; its wisdom not only, but its folly. We clothe ourselves in its robes of wisdom, and we still gather

WHY FRIDAY IS AN UNLUCKY DAY. We will now particularize just a little. Why should Friday be now regarded as an unlucky day? Nobody ever proved it so. As many facts against the notion can be found as those that favor it. Only if people get a fancy in their heads, they always forget the times when their fancy misses fire, and only remember when it hits. Is there anything in the nature of one day in the week to make it differ from others? Nothing. All days equally are caused by the turning of the earth on its axis, and thus bringing its differ-

And did you ever think of it? This is the old Jewish Sabbath or day of rest. And beyond question here is the origin of the one, as the eagle fought savagely with Sabbath. First it was unlucky to do anybeak and claws as long as one of his capthing on that day, because they were afraid of the god who ruled it; then, as tors was within reach.

God who is supposed to have made it his The Cabmen's Shelters, Take one more illustration. It is still a bad sign for the dog to bark at night under the window. It portends a death in the family. I haven't time to go into this at length, but this is a remnant of the old myth of Odin, the wild huntsman. John represents Jesus as saying that he would come for his disciples at death and receive them to himself. In all ages and in all religions it has been

troduced into Germany. All over rainy, foggy London at conshelters" stand directly in the middle of the streets, and with their rows of little windows all around look more like playhouses for children than establishments for the comfort of cabmen. They are picturesque little wooden buildings, all over gables and miniature balconies from which are suspended hanging plants. Plants also blossom in pots in the windows. Here the cabman cannot only warm his benumbed tingers, but can get a hot steak and a steaming cup of tea: so a policeman told me one morning on the top of the omnibus as we trundled along by the cabmen's shelter on Regent

I arrived at the future boss mining camp to-day, from Florence. If all that has been said about this camp is true, it will be a boss indeed. The Reymert mines were located about not been able to run during the dry well for water. The water used heretorore, has been from surface wells, which furnish an abundance of water for eight months in the year, but go virtually dry when the rains cease. The mine is said to be the largest in the territory, and enough ore is known to exist to run a mill for years. It is said that a seventy stamp mill may be put in operation if sufficient water is obtained. A failure to secure water here would probably result in the removal of the mill to the river. Mr. Harry Blauvelt is here. He was formerly with J. D. Walker & Bro., at the Vekol. He has charge of the assay-

ing bus ness. There are now about 27 men in the camp, and they are a good-natured crowd and know how to treat a stranger. No whisky is allowed to be sold here, and the company will not permit a saloon on their property. Over at the mine, two miles from here, there are
